Gateway 20-Child Manual

Overview

Gateway 20-Child targets preschool and school-aged children who are communicating using 1-2 word messages. They can recognize symbols of nouns, verbs and some adjectives and adverbs. These emerging communicators have the potential to improve their expressive language abilities. Some users may have transitioned from Gateway 12-Child to Gateway 20-Child.

The MAIN page of Gateway 20-Child contains the frequently used words – I, you, want, eat, have, go, wear, drink, make and play. It contains folders for People, Family, Things I Do (verbs), Little Words, Descriptive words, Things and Places. Each word and word category is color-coded according to a modified Fitzgerald Key format (i.e., People - yellow; Verbs – green; Little words – Pink, Descriptive Words – blue; Things – Orange and Places – purple). This color-coding is consistent throughout all of the Gateway files to ease the transition from one file to the next level of complexity.

The People category contains people, some pronouns and the question word "who". Within the Fitzgerald Key, "Little Words" are defined as prepositions, articles and conjunctions. Within Gateway 20-Child it contains several articles and a small core of prepositions. Within the Fitzgerald Key, "Descriptive Words" includes adjective, adverbs, and time words. Within Gateway 20-Child it contains a small core of each of these word categories.

Gateway 20-Child includes features to help children learn to form multi-word sentences and to expand the size of the core vocabulary. Sentence Development Links are used to provide a simplified approach to facilitate sentence formation. Selecting a *verb* results in automatically opening a page of associated objects or "Things" that the child can use to complete a message. For example, after selecting "eat" a page with common foods is automatically opened. The MAIN page is pictured to the right. Below it is the linked Foods page with the two blue Describe and Color/Shapes Folders. The "I + want + eat" is selected from the MAIN page. Once the Sentence Development *Link* opens, based on the example to the right, the user had selected "scrambled" from the "Describe" folder and would then select "egg" from the Foods page. If the foods provided on this page do not match the preferences of the user, these should be customized to match the child's eating preferences.

Most of the pages reached through a *Sentence Development Link*, also contain both a "Describe" and "Color/Shapes" folder. These folders or links provide additional

opportunities for a child to expand his/her sentence complexity by adding an adjective or adverb to the message. A child can easily ask for the "chocolate" or "big" cookie, without needing to navigate away from the food context. Efforts have been made to match the descriptive words within these links to the vocabulary on the targeted object page. That is, the word, "chocolate" is provided for the food and make pages, but the word "brown" is provided with the clothing items.

Within the "Things I Do" page, *Semantic Power Strips* are introduced. *Semantic Power Strips* are sets of paradigmatically associated words that provide a focused array of vocabulary to broaden the options available to the user. For example, selecting a symbol such as "say+" as pictured to the right, will open a semantic power strip

containing semantically related words. In the example of "say+".

semantically related words are sing, talk, call, promise speak and yell. In Gateway 20-Child, "cooking+" opens a *Semantic Power Strip* containing "cooking, mixing, pouring and baking.

Speaking children learn language by hearing the words of a language and using those words to communicate. For users of AAC systems it is a challenge for young child to learn to add word endings when communicating. They must develop the metalinguistic knowledge to know that an "-ing" or and "-ed" is added to a words. Within 20 – Child, the present progressive verb form, '-ing", is modeled for some of the verbs on the verb page. The intent is to promote spontaneous usage of this verb form when communicating in later page sets.

A "My Themes" folder is located on the Main Page. This folder links the child to a set of five *Thematic folders* – About Me, Time to Chat, Time to Learn, Time to Play, and Time in Town. Each of the folders contains a variety of words, messages of activity sets designed to increase a child's opportunities for participating in dialogues, educational and recreational activities.

The About Me folder enables a user to share some basic identifying information about himself. The *Time to Chat* folder

contains five subfolders helping a child learn to ask questions and to comment. The *Time to Learn* Folder contains a monthly topic folder with single words and/or phrases often used within the context of the school setting. This folder also contains vocabulary for *Circle Time* and Common Core. The goal of the *Common* page is to support children's whose educational program uses the Common Core. It enables a child to make generic responses that may enhance participation across a variety of activities.

The "Time to Play" folder (pictured on the right) offers twelve (12) play activities for a child to engage in with peers or mediated with an adult communication partner. These include *Tea Party*, *Dress-Up*, the *Candy Land* game, *Store*, the *Hi-Ho-Cherry-O*

game, a Let's Read general Literacy page, the book, "Clifford's Animal Sounds", the book, "Have you Seen my Cat?", a Farm page, a Zoo page, a page to play Doctor, and a page to learn to Make a Phone Call.

The "Time in Town" Folder includes pages that can be used when communicating within the community. The ten (10) thematic pages include *Grocery Store, At the Mall, Vacation, McDonald's, Ice Cream, In the Park, Amusement Park, Religion, Boy Scouts, Girl Scouts and Mealtime Chat.* The goal of the *Mealtime Chat* page is to help a child use "small talk" during a meal. There are three open pages created for custom activities.

Practice Sentences

The practice sentences are provided to help the adults working with a child using this page set to become familiar with the contents and location of some of the core vocabulary. It is also intended to demonstrate the complexity of sentences that can be created using Child 20. Navigating Gateway Child-20 is simple once the organization is understood.

The following sentences can be created using the MAIN page followed by a *Sentence Development Strip*. Since the folders automatically close when a vocabulary item is selected, upon speaking the last word of each sentence, Gateway returns the user to the MAIN page.

- I want eat ice cream.
- I drink apple juice.
- You want make picture.
- I wear slippers.
- I play with computer game.

The following sentences make use of the *Describe* and/or *Color Shapes* folders located within the respective Sentence Development Strips. The bold words in Blue are the items contained within the respective folder.

- You want make sparkle necklace.
- I eat melted ice cream.
- I wear polka dot slippers.
- I play with big teddy bear.

The following sentences make use of the folders *People, Family, Things I Do, Little Words, Describe, Things, and Places.* The words are colored according to the Fitzgerald Key format and match the colored folders with the Gateway page set.

- Mommy baking the yellow cookie.
- Boy swim with grandfather.
- She love the pool.
- I want to make pretty picture give daddy.
