Gateway 66 - Child and Teen/Adult - Text 66 Manual

Overview

This manual contains material relevant to Gateway 66-Child, Gateway 66-Teen/Adult and Text 66. *Gateway* 66-Child targets school-aged children benefiting from an efficient and powerful core word vocabulary. Gateway 66-Child is a logical next step for children using Gateway 40-Child who now require a more complex vocabulary and/or who have made significant gains in expressive language performance. *Gateway* 66-Teen/Adult targets teen and adult users who require an efficient

core word vocabulary. The Text 66 page set is replicates the contents of the Teen/Adult 66, however all symbols have been removed to for users who prefer a text-based system. These page sets effectively meet the needs of competent communicators as well as those working to gain linguistic competence. Since all page share a similar organization and only differ in fringe vocabulary, a single manual has ben created. Separate Page and Alpha sorts are included within this manual for Gateway 66-Child and Gateway 660Teen/Adult-Text 66.

Gateway's powerful MAIN page has a core of the most frequently used words of the English language accessed through a single key selection. A *School & Community Core* page enables users to access topical school and community-based vocabulary without navigating from Gateway's MAIN core. Gateway 66 utilizes the *Dynamic Morphology* feature to minimize keystrokes. The design of the Gateway 66 results in an average of 1.3 keystrokes per word.

Semantic Power Strips, sets of paradigmatically associated words, provide expanded vocabulary selection without navigating from the MAIN page. Semantic Power Strips are included for mom, dad and many verbs. They are represented by a "+" sign following the button label. The Semantic Power Strips are sets of paradigmatically associated words that provide a focused array of vocabulary to broaden the options available to the user. For example, selecting "know+" will open a semantic power strip containing –

understand, remember, think, pretend, teach, learn and know. Semantic Power Strips are also used for the pronouns *he+* and *she+* on the MAIN page.

Gateway 66 includes *Sentence Development Links* for eat, drink and wear. Other verbs are no longer linked under the premise that users are generating more unpredictable messages and require an open system.

The Gateway 66 MAIN page contains word morphology button that includes the word endings (-ing), (-ed) (-s) (-er) and (-est) to create requisite word forms. Users can add these morphological endings as needed within the context of natural conversation.

Gateway 66 incorporates use of Gateway's *Dynamic Morphology* feature (i.e., word endings are automatically added to verbs without requiring additional key selections). Verb endings are automatically added to 3rd person singular, present progressive, and the infinitive verb forms. A *Helping Verbs* Button contains parts of the verb "to be" – am, is, are, was, were, be and to be. Selecting any of these buttons activates the *Dynamic Morphology* feature adding –ing to each of the verbs as needed.

A spelling with word prediction page is included to address a user's need to express words not represented in the page set. Both the Child and the Teen/Adult Gateway 66 files come with two Spelling pages. A Direct Selection Spell page is the primary spell page that is loaded for each page set. This page is pictured to the left. The 66-Child scanning file is CG66Spell_Scan and the 66-Teen/Adult scanning file is TG66Spell_Scan. Either of these files can be substituted for the QWERTY format page pictured above. The spelling page is linked to

both the MAIN and School/Community core pages as well as to the Time to Learn Tab. Each of these links would need to be modified if one chooses to replace the direct selection file with the scanning spelling page.

In addition to its core words, the MAIN page of Gateway 66 has folders for Questions, People, Pronouns, Things I Do, Little Words, Colors, Helping Verbs and Spelling. These same folders are consistent for the Home Core and School & Community Core. There are six (6) folders that change depending upon whether one is in the Home Core or School & Community Core Environment. The Home Core, pictured above, provides a user access to folders for Things, Toys, Party, Household and Clothes.

Each folder may have one or more subfolders offering additional related vocabulary. For example, the *Describe Folder* has subfolders for *Opposites, Feelings, Sensory, More Time and Numbers*. The Things Folder has subfolders for Foods, Body Parts, Animals, Vehicles and Nature. The subfolders contain fringe vocabulary that is not on any high frequency word list. The *School Core*, pictured to the right, contains folders for *School Things, School Places, Test, Science, Social Studies, News*, and *Events*.

A Question folder contains more than just the words: who, what, where, when and how. It contains several auxiliaries and models to enable the child to create questions without navigating from the questions page.

A My Themes folder, links the user to a set of six thematic folders – About Me, Comments and Questions, Time to Learn, Time to Relax, Time in Town and Manners. Each folder is designed to increase opportunities for participating in social situations, well as in educational and leisure activities. The About You & Me tab must be customized for the child. It can provide a means for a user to provide personal information and also to ask questions to a communication partner.

The Questions & Comments Tab provides some general questions and should be customized to enable the user to ask relevant questions on an on-going basis. The Comments, Manners and Silly Things tabs can enhance a user's pragmatic performance and use language in a variety of communicative contexts.

The *Time to Learn* tab, pictured to the right, provides monthly theme pages, blank pages that can be customized for each subject along with additional core vocabulary typically used in the school environment. Several of these subject folders link to the *School Core* page so the topical vocabulary can also be used when the user may be required to respond using more than a single word response. *Time to Learn* tab provides access to the Spelling and Numbers pages.

The 66-Child *Time to Relax* tab contains eleven activity folders and three blank pages. It includes activity pages for *Bingo, Cards, TV, Camp* page, knowing that many young adults continue to attend AAC camps. and a *Snack*. It also has vocabulary for the game, *Guess Who*, a *Jokes* page, and *Riddles* page. There is a general literacy page, a magazine page and the book, "Where the Wild things Are".

The 66-Teen contains eleven activity folders and three blank pages. It includes activity pages for *Bingo, Cards, TV, Magazine* and a *Snack*. It also has vocabulary for the game, *Guess Who*, a *Jokes* page, and *Riddles* page. There is a *Camp* page, knowing that many young adults continue to attend AAC camps.

The *Time in Town* page has pages that can be used within the community. Each of these would require some customization so they are most meaningful for the user. Pages include: *Restaurant, At the Mall, McDonald's, Ice Cream, Vacation, Amusement Park, Doctor's, Hair Salon, Grocery, Make a Call, Vacation, Religion, Scouts and in the Park.* The Scouts and Religion pages are open for customization. There are an additional three blank pages to support the personal activities of the user.
