### Gateway© Pro\_TC User Manual

#### Overview

The Gateway Pro\_TC (Pro for TouchChat) page sets targets school-aged children with advanced literacy skills, as well as teens and adults who could benefit from an efficient and powerful core word vocabulary. Gateway Pro\_TC is a logical next step for children using Gateway Child 66 who now require a more complex vocabulary and continue to need access to a large core word vocabulary and open locations to address their academic needs. It

also targets teen and adult users who require an efficient core word vocabulary with fringe vocabulary related to independent care needs and community activities. Pro effectively meets the needs of competent communicators. Gateway Pro\_TC, pictured to the top right, requires that users demonstrate good to excellent fine motor skills.

The MAIN page of Pro has a powerful core of the most frequently used words of the English language accessed through a single keystroke. Like all of the Gateway page sets, these page set use the Fitzgerald Key format as the format for organizing vocabulary. Words categorized as *People* are yellow, *Verbs*, are green, *Little Words* are pink, *Descriptive Words* are blue, Things are orange and *Places* are purple. Unlike the other Gateway page sets where folders are used to symbolize the link to other pages, within all versions of *Pro*, a solid colored button is used to indicate that the button is a link to another page. A solid colored button indicates a link to another page or to a popup. A Phrases button, provides sentence starters and auto-closes when appropriate.

Academic vocabulary can easily be accessed through folders on the Main page. A *Topics* button is included which links the user to a powerful array of frequently used phrases and sentences along with a wide range of topic pages for use within the community.

Gateway Pro\_TC utilizes Gateway's *Dynamic Morphology* strategy (i.e., word endings are automatically added to verbs without requiring additional key selections) has been incorporated to minimize keystrokes. Verb endings are automatically added to 3<sup>rd</sup> person singular, present progressive, and the infinitive verb forms. The Pro MAIN page also contains a *Word Endings* button that includes the word endings (-ing), (-ed), (-s), (-er) and (-est) to enable a user to create the requisite word forms.

Users can add these morphological endings as needed within the context of natural conversation. The design of theses page sets results in an average of 1.1 keystrokes per word across conversation.

In addition to its core words, the MAIN page of *Pro* has folders for key categories such as *Questions, People, Pronouns, Verbs, Little Words, Describe, Thinks, Foods and others.* Folders may have one or more subfolders offering additional related

vocabulary. For example, *Things* has subfolders for Animals, Body Parts, Leisure, Hygiene, Money, Nature, Party, and Vehicles. The subfolders contain fringe vocabulary not contained on any high frequency word list. The Question folder contains more than just the words: who, what, where, when and how. It contains several auxiliaries and models to enable the users to create questions without navigating from the questions page.

Semantic Power Strips, sets of paradigmatically associated words, provide expanded vocabulary selection without navigating from the MAIN page. Semantic Power Strips are included for many verbs.

The Semantic Power Strips are sets of paradigmatically

associated words that provide a focused array of vocabulary to broaden the options available to the user. For example, selecting "know+" will open a semantic power strip containing – understand, know, think, remember, learn, teach and pretend. Since Pro\_TC has uses a 13 \* 11 grid, there are numerous open buttons for a user to personalize the vocabulary adding their own frequently used words.
